

Anzac Station

Anzac Station concept image – Melbourne's first direct tram/train interchange

The Metro Tunnel will run the busy Cranbourne, Pakenham and Sunbury lines through a new tunnel under Melbourne's CBD, with bigger and more modern trains and next generation signalling for turn up and go services.

The Metro Tunnel will open in 2025.

Anzac Station will provide train access for the first time to St Kilda Road, including Melbourne's iconic Shrine of Remembrance, Royal Botanic Gardens and Albert Park.

The station will also be Melbourne's first direct tram/train interchange, taking pressure off Swanston Street trams and reducing travel times for up to 40,000 people who live and work on St Kilda Road.

The tram stop at street level will be linked by escalators, stairs and lifts to the station concourse and platforms directly below.

Two more entrances at the edge of the Shrine of Remembrance Reserve and at Albert Road Reserve are linked by a safe, convenient public walkway under busy St Kilda Road.

Major upgrades to bike lanes along St Kilda Road will make it safer and easier for cyclists in the area.

VICTORIA'S BIG BUILD

Anzac Station concept image – artwork Future Wall Painting by Raafat Ishak

Station design

Anzac Station’s distinctive 90m-long by 20m-wide timber canopy has been designed to fit within neighbouring parklands – the Shrine of Remembrance Reserve and Royal Botanic Gardens.

The canopy floats above the station, allowing natural light to flood the concourse below and protecting passengers from the weather.

A wide new pedestrian underpass below St Kilda Road links this parkland directly to Albert Road Reserve, which will be transformed into a generous green space.

Anzac Station will have Victorian-first platform screen doors for better safety, climate control and less noise.

How to access Anzac Station

Accessibility

Accessibility is at the forefront of design for the Metro Tunnel, with stations that are accessible and inclusive.

The new trains that will run through the Metro Tunnel have improved Passenger Information Displays, audible announcements and hearing loops, level access to the platform and accessible seats.

The five new underground stations in the Metro Tunnel will include:

- escalators and lifts
- customer service counters and Customer Help Points
- generous platform widths
- Tactile Ground Surface Indicators
- braille and tactile signs
- audible announcements and hearing loops

- improved Passenger Information Displays
- accessible toilets, ambulant cubicles and Changing Places
- dedicated evacuation strategy for people with restricted mobility.

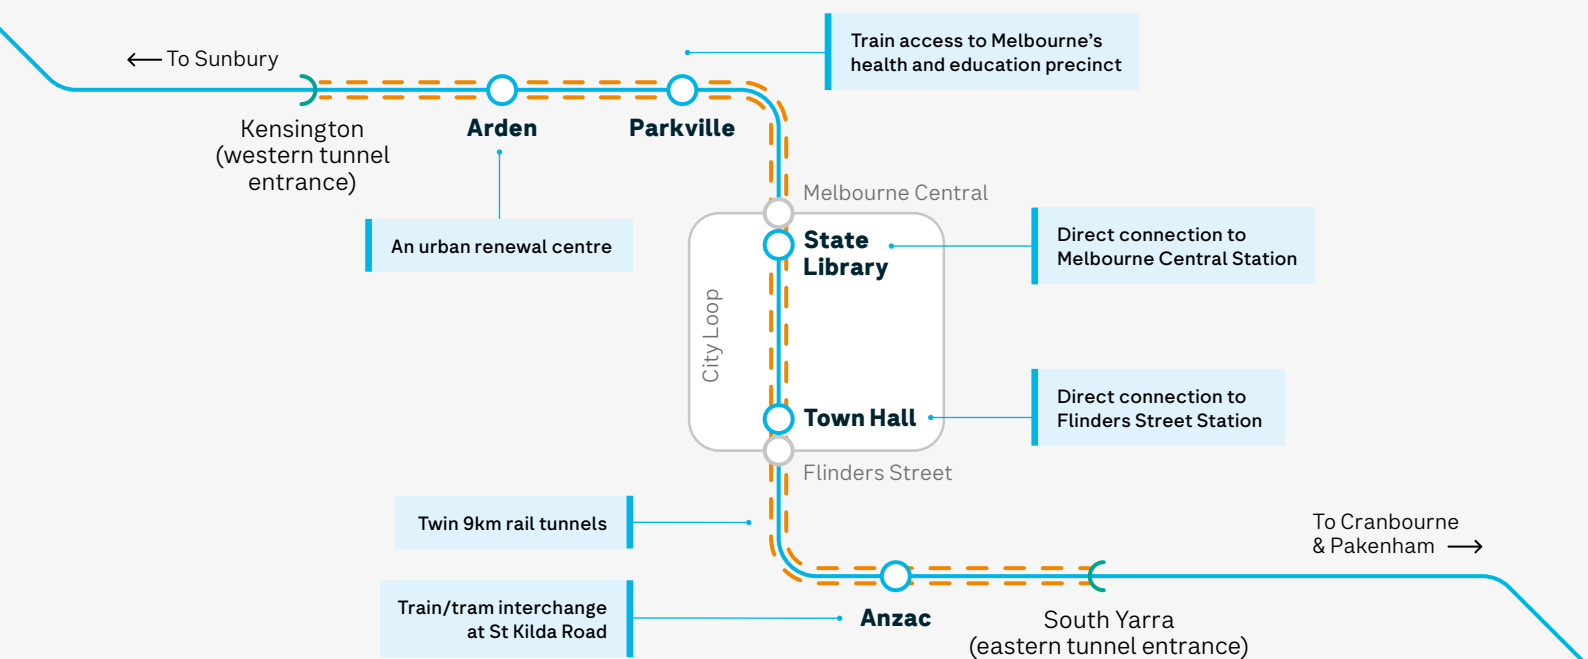

Anzac Station's tram stop is accessible from pedestrian crossings near Albert Road and Domain Road, and features raised platforms to allow easy access for wheelchair users to board low floor trams.

Lifts will take people directly from entrances at Albert Road, the Shrine of Remembrance Reserve and the tram platform to the train platforms below ground.
