Cut and cover works at  
Outbound TBM retrieval pit

# West Gate Tunnel Project MTIA update

# West Gate Tunnel Neighbourhood funds

- The inaugural round of the West Gate Neighbourhood Fund – Partnerships closed on 26 February 2020.
- A great response was received to the round with a balance of applications from across both the Hobsons Bay and Maribyrnong Local Government Areas.
- Applications are currently being assessed, with input to be sought from CLG members in April.
- Timing is being considered for the launch of the West Gate Neighbourhood Fund – Grants.

# West Gate Tunnel Project MTIA update

## Brooklyn Open House

- On Wednesday 11 March, we spoke to 20 Brooklyn residents and businesses at an 'Open House' information session.
- All three parties (WGTP MTIA, Transurban, JV) were present to answer any questions the local public had.
- WGTP also held a separate stand representing the West Gate Neighbourhood Fund, with many locals interested in how the funds will be distributed.

## Soil Management

- The project parties are working with the EPA to find a solution to manage the rock and soil that will be created during tunnelling.
- Factsheets have been published and sent to CLG members and are available on the project website.
- <http://westgatetunnelproject.vic.gov.au/construction/soil-management>
- The EPA has published a PFAS factsheet and videos on their website
- <http://epa.vic.gov.au/pfas>
