

# Stages of Construction

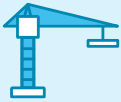

**Connecting the new bridge to the rail system**

**Building the base**

**Hiring workers**

**Lifting the bridge beam**

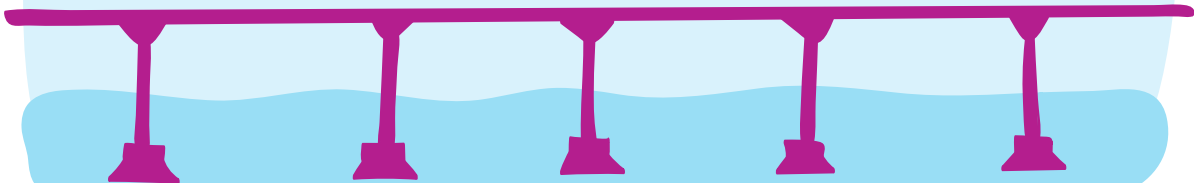

**All aboard!**

**Planning and design**

## Instructions

Order the stages of construction by numbering them from 1 to 6 in the boxes.

# What do we need to create a new rail bridge?

Draw and label your own rail bridge below and make sure to include everything we need!

## Mad libs

If I were building a rail bridge, the first step is \_\_\_\_\_ so I know what my bridge will look like and where it will go.

I can't make this bridge on my own, so I will need \_\_\_\_\_ to help me build the new bridge and make sure it is safe.

My bridge will need to sit firmly in ground, so I will get a big \_\_\_\_\_ to dig some \_\_\_\_\_ that will be filled with \_\_\_\_\_ to make a solid base.

Next, I will also need a huge \_\_\_\_\_ to lift heavy \_\_\_\_\_ into place to form the platform of my new bridge.

The trains will need a \_\_\_\_\_ so they can travel on my new bridge and I can't forget to connect the \_\_\_\_\_ so they know when it is safe to go.

\_\_\_\_\_ Everything works and is in place on my new rail bridge. Ready, set, \_\_\_\_\_
