

Regional Rail Revival Design Challenge 2050

Final Pitch Competition Evaluation Criteria

Following Stage 2, the winning team will be determined according to the following criteria:

Team: _____ **School:** _____

Prototype Description: _____

Competition Criteria	Evaluation of Performance & Understanding				Panel Comments (based on evidence shown)		
	Not Shown	Novice	Intermediate	Expert			
Prototype Viability and Functionality (live or video demonstration)	No demonstration was provided.	Concept demonstrates some understanding of user-needs or issues.	Concept shows solid understanding of user-needs or issues.	Concept shows excellent understanding of how user-needs and issues led to the design challenge idea.			
		Pitch may reveal misconceptions in facts and data, or methods that may not have a clear link to the design challenge idea. The pitch illustrated some design solution functionality and indicated how it could impact the end-user.	The pitch is consistent with facts, data and methods that informed the design challenge idea. The pitch illustrated the design challenge solution's technical functionality and made clear the potential impact on the community.	The pitch makes sophisticated use of facts, data and methods to justify the design solution. The pitch illustrated the design challenge solution's technical functionality and made strong and apparent links to its potential application and impact on the community.

Competition Criteria	Evaluation of Performance & Understanding				Panel Comments (based on evidence shown)			
	Not Shown	Novice	Intermediate	Expert				
Live Presentation	No live pitch or presentation was provided	The presentation was reasonably clear and articulate. It gave some insight into the team's research and their agency in designing and developing their prototype.	The presentation was clear, articulate and engaging. It gave a solid overview of the team's research into the issue and their agency in designing and developing their prototype.	The presentation was very clear, articulate, highly engaging and creative. It gave strong insight into the team's research and analysis of the issue and their agency in designing and developing their prototype.				
		The presentation noted some features, advantages and benefits of the prototype in context of the Regional Rail Revival.	The presentation noted the key features, advantages and benefits of the prototype in the context of the Regional Rail Revival.	The presentation detailed the key features, advantages and benefits of the prototype in the context of the Regional Rail Revival.				
	0	2	4	6	8	9	10	
Responses to Panel and Audience Questions	No responses were provided to Panel and Audience Questions	The team's responses to questions indicated a sound knowledge of community transport needs.	The team's responses to questions indicated a good knowledge of community transport needs and explained their potential to improve regional connectivity.	The team's responses to questions indicated a very strong knowledge of community transport needs and detailed their potential to address issues of regional connectivity.				
		The responses somewhat helped to illustrate how Enterprise skills were valuable to the team's design processes.	The responses clearly helped to illustrate how Enterprise skills were valuable to the team's design processes.	The responses extensively illustrated how Enterprise skills were valuable to the team's design processes.
