

NARRE WARREN- CRANBOURNE ROAD UPGRADE

JUNE 2022

The Narre Warren-Cranbourne Road Upgrade is underway.

We're adding an extra lane in each direction to improve traffic flow and travel times. We're also upgrading intersections with new traffic lights, making it easier and safer to get to where you need to be.

When complete this significant project will improve traffic flow, safety and access for motorists, cyclists and pedestrians in the Cranbourne area.

What's been happening on the project?

In recent weeks we've installed road safety barriers to protect motorists and pedestrians from construction activity and established site compounds on the corner of Narre Warren-Cranbourne and Camms roads.

We've also started removing trees and vegetation in areas where the new lanes and intersections will be built. We've worked closely with ecologists to ensure local fauna are safely relocated. We've also donated mulch and reusable timber to local schools and community groups.

Our first community information session was held at Hunt Club Village Shopping Centre on 13 April where we spoke to more than 200 members of the community about the project.

We'll continue to hold community information sessions as the project progresses. To register for updates visit roadprojects.vic.gov.au/subscribe or text NWCR to 0499 073 073.

What's coming up?

With the road safety barriers in place, we're ready to start:

- constructing haul roads to transport materials to and from site behind barriers to minimise the number of heavy vehicles on the road
- removing soil, vegetation and other items like signs, fences and light poles in the works area
- relocating and protecting underground utility services.

Many utility services run either along or across the road, providing essential services to many homes and businesses. In the coming months, we'll begin protecting and relocating water, electricity, telecommunications and gas.

We're working with a number of utility service providers to ensure this work is completed with minimal impact to supply. You'll be notified in advance of any changes to utility services. If you experience interruptions to your supply please contact your utility services provider.

You may not always see these works happening, as much of it will take place underground or behind traffic barriers to minimise impacts on traffic and ensure safety of the workers, motorists and community.

You will however see an increase in construction vehicles in the project area as well as some construction related noise, vibration and dust during excavation works.

We'll be in contact with you prior to commencing any works that will directly impact you.

Continuing lane closures and reduced speed limits

Throughout construction we'll continue to have temporary lanes closures and reduced speed limits in place as required.

Our works will occur Monday to Friday 7am to 5pm, however we will work on weekends and overnight on occasion to minimise disruption to traffic and the community. If we need to work overnight near your property we will be in touch.

When there are changes to traffic conditions, please follow on-road signage and traffic controllers' instructions – they are in place to help you travel safely through the area.

We are working closely with PTV, local bus companies and schools to ensure that detours and traffic management allow the local community to get to where they need to go.

Any traffic changes will be communicated in advance to help you plan your journeys.
