

South Geelong to Wauran Ponds Duplication

Building South Geelong Station

The South Geelong to Wauran Ponds Duplication project will deliver more frequent and reliable services and better stations for passengers on Victoria's busiest regional rail line.

We are upgrading South Geelong Station, building a second track, an accessible pedestrian overpass, a new station building and waiting room and redesigning the car park.

As with any project of this scale, temporary construction impacts and disruptions will occur. We aim to minimise impacts to passengers, residents

and businesses wherever possible and will notify well in advance of works occurring.

We will undertake a staged approach to upgrading South Geelong Station so we can carry out works safely, while keeping the station open and minimising disruption as much as possible.

Upgrading the South Geelong Station

1

Site establishment

First we'll build a temporary car park on the north side of the station on Carr Street. This will ensure station users have somewhere to park when we need to close sections of the existing car park while we complete the station upgrade. As part of this work we will establish a site compound within the station car park on Swanston Street.

2

Relocation of services

We will relocate underground and overhead services, as well as install temporary fencing and hoarding to protect the local community from construction activities.

3

New platform foundations laid

At this stage of the build, the site compound will be relocated to the station entrance on Yarra Street and the foundations for the new pedestrian overpass and platform will be built.

4

Overhead canopies installed

The overhead canopies for the new platforms will be installed.

5

Upgrades to the station building

The old station building will be demolished and rebuilt with a new forecourt.

New signage will be installed throughout the precinct as well as lighting, CCTV, parkiteers and bike hoops.

6

Adding the finishing touches

Landscaping, creative treatments and the installation of public artworks will occur around the station precinct.

7

Commissioning

Commissioning of the new duplicated track and second platform is required to integrate the new infrastructure into the operating rail network to enable additional services to run on the line.

8

South Geelong Station completed late 2024

Keep informed

We will work closely with residents living near our work sites, to ensure people receive regular information and know who to call if they want to talk to someone.

Our 1800 number operates 24 hours a day. To receive updates about the South Geelong to Warrn Ponds Duplication sign up to our eNews at regionalrailrevival.vic.gov.au/geelong or follow us on Facebook facebook.com/RRRGeelongWarrnambool

Upgrading the Geelong Line

The Victorian and Australian governments are investing more than a billion dollars in projects to deliver better and more frequent services for communities between South Geelong and Warrn Ponds. This includes the South Geelong to Warrn Ponds Duplication, Warrn Ponds stabling and the completed Warrn Ponds Station upgrade.

The South Geelong to Warrn Ponds Duplication project will enable more frequent and reliable services and better stations for passengers on Victoria's busiest regional rail line.

The project is part of the Regional Rail Revival program which is upgrading every regional passenger line in Victoria and creating 3,000 jobs. Rail Projects Victoria is delivering the program on behalf of the Australian and Victorian governments.

Both governments have also invested in Geelong Fast Rail, to deliver faster services between Geelong and Melbourne.
