

Sunbury Station precinct

Monthly construction update

Sunbury Rail Line and Gap Road Level Crossing

December 2022 and January 2023

We're enabling bigger, more modern trains to run on the Sunbury Line and have removed the dangerous and congested level crossing at Gap Road. The new road underpass is now open to traffic, with some project finishing works remaining.

In December 2022 and January 2023, crews are working to complete the finishing touches on the Gap Road Level Crossing Removal project.

Construction snapshot

Current and upcoming construction works in Sunbury include:

- Road sign rectification works
- Reinstatement works near Hungry Jacks
- Out of hours site use, equipment, and material deliveries
- Construction works near the Target shopping complex
- Project finishing works.

Further information on these works can be found overleaf or at railprojects.vic.gov.au.

When are we working?

Normal construction hours

7am to 6pm, Monday to Friday
7am to 1pm, Saturdays.

Out of hours

Some works are required to take place out of normal construction hours.

24 hours

24 hour works are sometimes required during peak construction activities.

Road sign rectification works

Gap Road and Station Street, between Evans and Horne Street

January 2023

- Removing the road sign on the east side of the rail bridge on Station Street
- Repairing the sign off site and reinstating it later in January
- To facilitate the removal and reinstatement of the sign, a full overnight westbound road and southern shared user path closure is required. These closures will take place on two separate nights in January 2023
- Works involve the use of a small crane, hand tools and other construction vehicles
- Works are anticipated to generate low levels of noise.

Reinstatement works near Hungry Jacks

Southern end of the Sunbury Station car park

Ongoing to January 2023

- Reinstating the area at 62 Horne Street that was used as a temporary car park for the workforce
- Removing gravel and conducting earthworks to reinstate the area
- Works are expected to generate medium levels of noise and vibration.

Out of hours site use, equipment, and material deliveries

35 Wilsons Lane

Ongoing to early 2023

- Using the construction site at 35 Wilsons Lane for the delivery, storage and assembly of materials until the completion of the Gap Road Level Crossing Removal Project in 2023

- Now that major works are complete, we will begin removing some equipment and materials from the site. Site usage will begin to decline as we undertake minor finishing works
- Works are expected to generate low levels of noise and vibration, with intermittent periods of high-level noise.

Construction works near the Target shopping complex

Target shopping complex car park, Station and Evans streets

Ongoing to early 2023

- Minor concreting, fixing kerbs, relocating trolley bays, line marking, and landscaping to reinstate the Target shopping complex car park. Work areas will be fenced off from the public at times
- The Target shopping complex car park will remain open, with directional signage and traffic management in place to assist with traffic and pedestrian movements during this time
- Works are anticipated to generate low to medium levels of noise and vibration.

Project finishing works

Gap Road and Station Street, between Evans and Horne Street

Ongoing to early 2023

- Minor finishing works will continue until early 2023. This includes soft and hard landscaping, inspections and any required rectification works
- Touching up areas of the newly installed handrails and railings on the northern side of the road underpass.

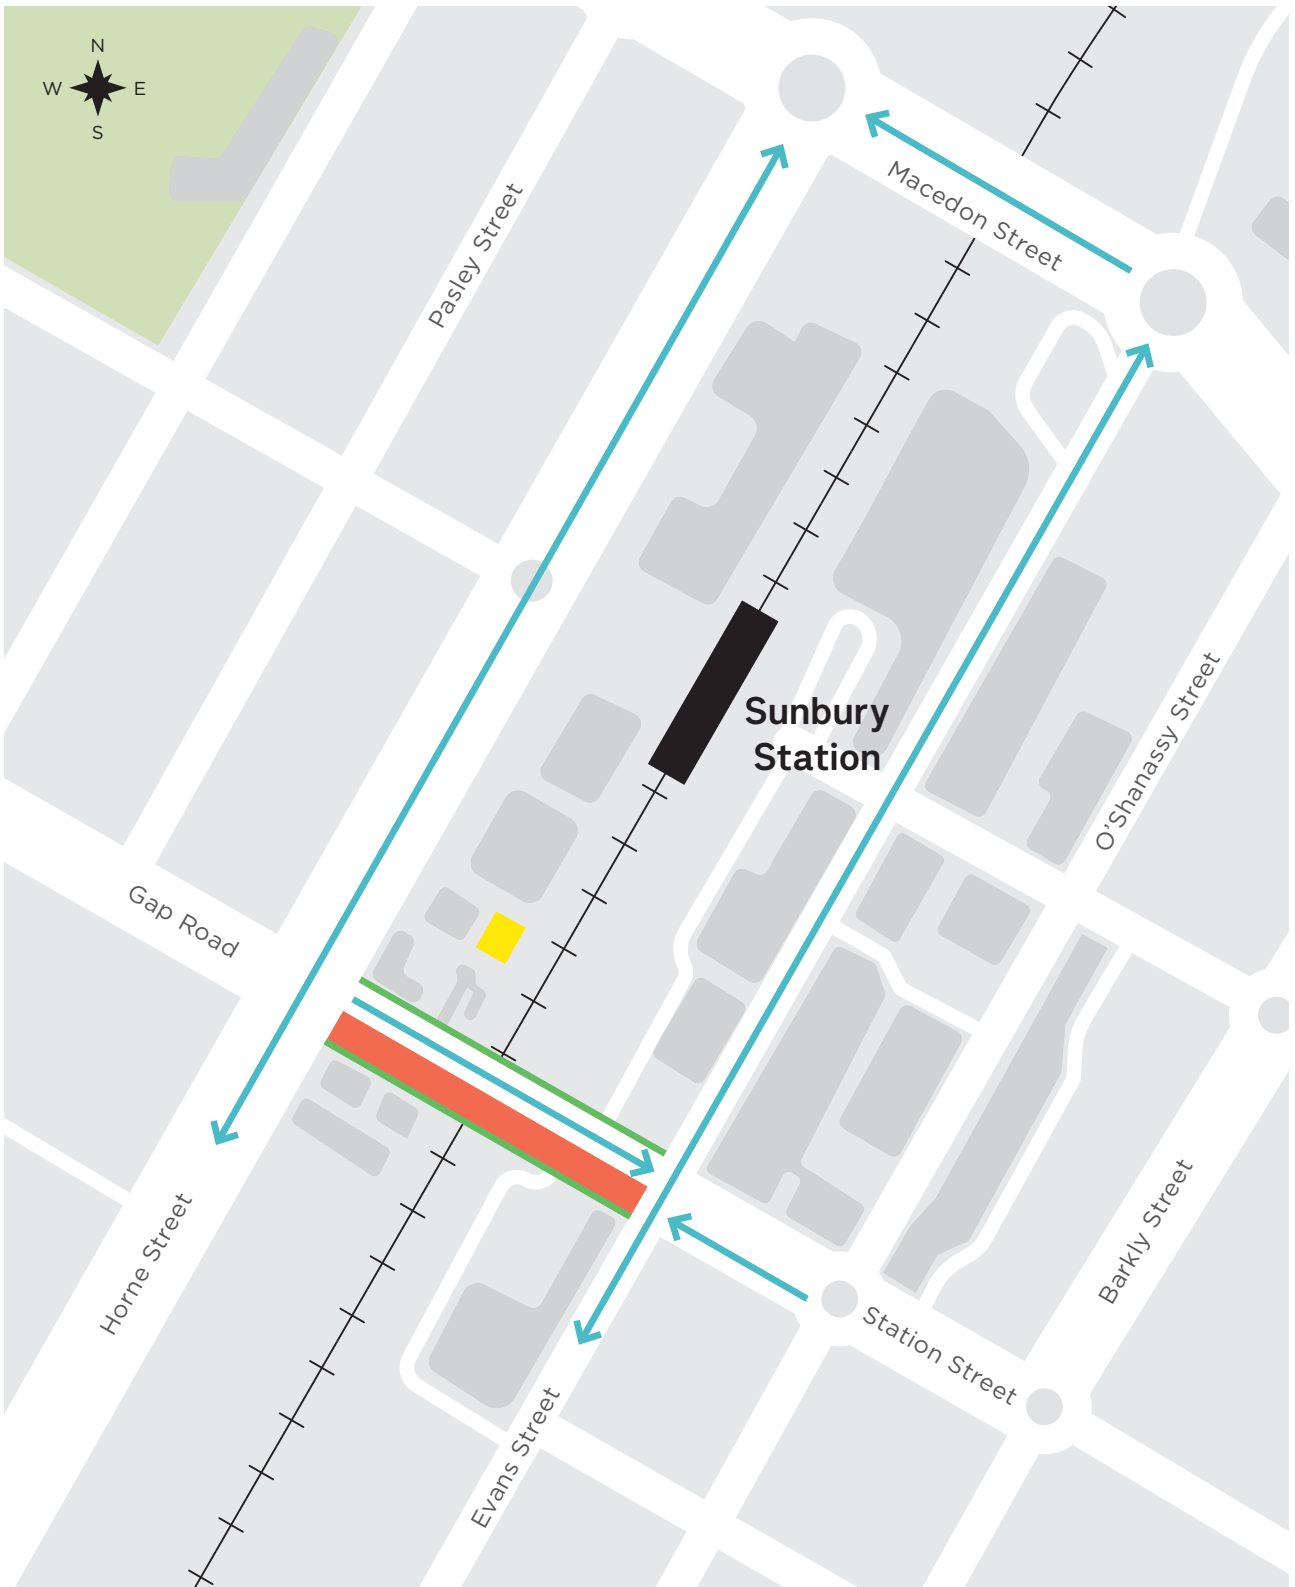

What to be aware of

- Lighting towers powered by generators are required during night works. Where possible, they will be positioned to face away from residential properties
- Works involve the use of NDD trucks, concrete trucks, excavators, hand tools, cranes and other construction machinery
- Water carts will be used to dampen materials to minimise the spread of dust.

Construction site, rail corridor access and laydown areas

- The remaining project team will use the construction site compound established at 3/49-51 Horne Street, Sunbury for worker amenities and restricted construction vehicle parking

- The site laydown area at 35 Wilsons Lane will be used until the project is complete. This site is being used for the delivery, storage and assembly of materials
- All sites will be used out of hours as required
- Traffic management will be in place to assist with construction vehicle access, as well as pedestrian and cyclist movements around construction sites
- Construction machinery will access sites via Raes Road, Shields Street, McDougall Road, Gap Road, Station Street and Sunbury Station
- Project crews will continue using the dedicated parking area at 62 Horne Street 24-hours a day until the area is reinstated.

- Two night westbound road closure and southern shared user path
- Detour route during overnight road closure
- Site facilities
- Ongoing finishing works

Long term traffic, transport and pedestrian changes

- The new Gap Road and Station Street underpass is open to traffic
- Ongoing finishing works may require further traffic management. Where possible, these works will be limited to off peak times only. Please observe signage when moving through the area
- Signage, traffic management and wayfinding are installed around work sites to safely direct vehicles, pedestrians and cyclists through the area.

Short term traffic, transport and pedestrian changes

- In January, there will be two overnight westbound road and southern shared user path closures in place. This is to facilitate the removal and reinstatement of the overhead sign on the east side of the rail bridge on Station Street. Detours will be in place
- At times, car spaces in the Target shopping complex car park will be occupied to facilitate reinstatement works until early 2023.
