

**SUBURBAN  
RAIL LOOP  
EAST**

# Initial and Early Works at Glen Waverley

Suburban Rail Loop (SRL) is a city and State-shaping project that will transform Victoria's public transport system, connecting our suburbs and making travel easier and more convenient.

SRL East will connect our growing health, education, retail and employment precincts in Melbourne's east and south east between Cheltenham and Box Hill.

The new underground SRL East station at Glen Waverley will be one of the most well-connected stations on the metropolitan network.

Located in the heart of Glen Waverley's activity centre, the new SRL East station will provide faster and more convenient access to the vibrant retail and hospitality area and quick journeys to universities, employment and hospitals to the north and south.

Before we start major construction on the tunnels and stations for SRL East, we are undertaking Initial and Early Works at each of the sites from Cheltenham to Box Hill, including Glen Waverley.

## What are Initial and Early Works?

Initial and Early Works involve activities such as utility relocations, site establishment, road modifications, site levelling and demolition works.

These works help prepare areas for major works while minimising the impact on the local community, businesses and road users during the Main Works.

Initial and Early Works began in 2022 and are being delivered by Managing Contractor Laing O'Rourke.

## SRL East Project Timeline

### September 2021

Initial Works community consultation

### November 2021 – May 2022

Environment Effects Statement (EES) consultation including Early Works

### December 2021

Initial Works approved

### September 2022

Early Works approved

### 2022

Initial and Early Works package starts

### 2025

Initial and Early Works finish

Main Works begin

## Initial and Early Works to be undertaken at Glen Waverley

Planned works	What the works involve
<b>Road modifications</b>	– Realigning Myrtle Street north-south to connect to Coleman Parade.
<b>Site establishment</b>	– Establishing temporary site facilities for project staff, lay down areas for construction materials and prepare the site for Main Works to begin – Activities include: <ul style="list-style-type: none"><li>• Traffic barrier and fencing installation</li><li>• Tree and vegetation removal</li><li>• Hazardous material removal (if required)</li><li>• Excavation and earthworks to clear and level the area</li><li>• Drainage installation</li><li>• Site demolition and clearance.</li></ul>
<b>Site investigations</b>	– Obtaining information about the existing ground conditions and identifying the location of utility services. This data helps inform project planning and construction methods.
<b>Utility relocations</b>	– Relocating underground utilities including power, telecommunications, gas, water and sewer to make way for excavation of the underground station.

## Planning approvals

Initial and Early Works have been assessed and approved via two separate planning pathways. Initial Works were assessed and approved by the Minister for Planning as part of the Clause 52.30 - State Projects planning provision.

Early Works were approved following the Minister's assessment of the EES. These approvals include a planning scheme amendment, project area designation and cultural heritage management plans.

## Managing impacts

As with any major infrastructure project, surrounding residents and businesses may experience some disruption during project works.

The project is committed to minimising and managing disruption for local residents, businesses and communities as much as possible. However, we do anticipate some potential impacts including:

- Changes to traffic conditions for drivers (including temporary speed reductions and lane closures), cyclists and pedestrians
- Some noise, vibration and dust from construction activities, machinery and vehicles
- Removal of vegetation and trees, where required
- Potential short-term impacts to driveway access and on-street car parking.

Before works start, we will notify and engage with residents and businesses about activities planned in their area, what to expect and how any disruptions will be managed.

## Your questions answered

### Will you notify the community about these works?

We will notify local residents and businesses about what to expect and how disruptions will be managed using works notifications, signage, advertising and notices on our website, social media channels and email newsletters.

### Will there be traffic impacts?

Yes, some works will require changes to traffic conditions. We will notify the local community ahead of these changes. Traffic management and speed reductions will be in place where required.

### Will homes and businesses be affected during the works?

Access to all residential properties and businesses will be maintained wherever possible throughout works.

We will work closely with residents and businesses ahead of works commencing to mitigate any impacts.

Thank you for your patience and cooperation as we progress the delivery of SRL East and a new underground station at Glen Waverley
