HILL**

Help us plan your neighbourhood

Suburban Rail Loop (SRL) will not only transform our public transport network – as Australia’s largest housing project it will also help deliver thousands more homes, jobs and services to the areas around the new stations.

To help achieve the balance of more quality housing choice, more jobs, and improved local amenities and open spaces, we need to change some of the planning rules. Draft structure plans and draft planning scheme amendments have been released for the neighbourhoods around the six SRL East stations – including your local area.

These documents take into account the extensive community and council feedback we’ve heard over several years – and we again invite the residents and traders of Box Hill to have their say.

The draft structure plan includes proposed changes to land use, height limits and building designs, car parking, open space, connections and many other urban planning outcomes that will help ensure Box Hill grows sustainably and remains a vibrant place to live in the decades ahead.

Take a look inside to see more details about the future direction of your neighbourhood, including how we’ve responded to your feedback. You’ll also find information about where to speak to our experts and how to make a submission – so you can help shape your community for the next generation.

Works in Box Hill

What’s in store for 2025

We’re pushing ahead with major construction of SRL East and preparing launch sites for the tunnel boring machines (TBMs). The first TBMs arrive on site later this year, ready to start tunnelling in 2026.

Take a look inside to see what crews are doing in Box Hill in 2025.

Box Hill in 2041 with SRL

**5,900
additional homes**

**20,200
additional jobs**

How we've responded to your feedback in the draft structure plan

We've reduced proposed building heights in some areas, including:

Location	From	To
The western end of Zetland Road	6 storeys	4 storeys
Severn Street (east of Nelson Road) and Dorking Road	7 storeys	4 storeys
Albion Road and the southern end of Barcelona Street	6 storeys	4 storeys

- The most significant housing growth is planned for central Box Hill.
- Workspaces are prioritised to be built in central Box Hill and particularly along Prospect Street and Rutland Road.
- We will ensure the current and future community needs for kindergartens and government primary and secondary schools are considered.
- The open space network will be enhanced to enable access to high-quality open spaces within a 400 metre walk of residents and workers.
- Any new open space at the former Box Hill Brickworks should be accessible and connected to existing open spaces.

How to make a submission

Submissions relating to the Box Hill Draft Structure Plan and planning scheme amendment must be received by **11.59pm on Tuesday 22 April 2025.**

To make your submission, head to engage.vic.gov.au/srl-east-structure-planning or scan the QR code, click 'Make a submission' and follow the prompts.

Need help?

Copies of the draft structure plans and planning scheme amendments are available to read at the Box Hill Library at 1040 Whitehorse Road and the Whitehorse Council offices at 379-399 Whitehorse Road.

If you need help to make a submission, there will be webinars coming soon, and local information sessions where you can chat with our team. Translators will also be available.

Head to engage.vic.gov.au/srl-east-structure-planning for details.

SRL East in 2025

2025 is SRL's biggest year yet, with major construction underway and tunnel boring machines arriving.

Temporary bridge construction

Box Hill works

Crews will finish building the temporary bridging structure on Whitehorse Road, which will be used in the future by traffic and pedestrians when workers start to build the station underneath. Works to move underground services in Box Hill Gardens will continue until mid-2025.

Tunnelling starts in 2026

Six SRL East tunnel boring machines (TBMs) have been ordered and will start arriving on site later this year. Next year, they'll launch from sites in Clarinda and Burwood to begin carving the 26 kilometres of twin tunnels. These TBM launch sites are now under construction.

Did you know?

SRL East opens in 2035, making it faster and easier to get to work, university, medical appointments, shops and restaurants. Around 70,000 passengers will use SRL East every day.

-  SRL East underground station
-  Transport super hub (regional connection)
-  SRL East rail tunnel alignment
-  Existing rail alignment
-  SRL rail tunnel continued
-  Stabling facility
-  TBM launch site
