

# Reinstatement and public realm works

## Elizabeth Street northbound service lane, between Haymarket Roundabout and Grattan Street

**From late-March to late-April 2023**

Throughout the Parkville Station precinct, staged reinstatement and public realm works are continuing until late 2023. These works will include service relocations, footpath, kerb and road pavement construction, traffic signal modifications, and the installation of bus stops, street furniture, lighting and landscaping.

Reinstatement works will take place up to property boundaries, including on footpaths and directly adjacent to building entrances. There will be changes to the way you move around the precinct during these works.

Service proving works have been completed in the Elizabeth Street northbound service lane, between the Haymarket Roundabout and Grattan Street, and reinstatement works will commence from late March.

### What we are doing

- The Elizabeth Street northbound service lane will remain closed
- These works will be completed in three stages to ensure access to the Peter MacCallum Cancer Centre loading bay is maintained at all times (see maps)
- Loading bay access will be maintained via traffic control during construction hours
- The site will return to the current arrangement outside of working hours to facilitate loading bay access
- Two five-minute parking spaces on Elizabeth Street, adjacent the Peter MacCallum Cancer Centre will be temporarily removed during stage one and two (see maps)
- Alternative five-minute parking has been arranged for this period at Grattan Street west, adjacent to the Peter MacCallum Cancer Centre
- Vehicle and cyclist northbound access will be maintained via the Elizabeth Street centre lane
- Pedestrian access will be maintained at all times

- Traffic control and signage will be in place to safely direct vehicles, cyclists and pedestrians around the work area
- Access to the #19 tram stop on Elizabeth Street will be maintained during these works
- Access to local businesses will be maintained at all times
- These works are expected to generate periods of medium to high level noise, depending on the work activity
- These works are weather dependent
- Final asphaltting and line marking is scheduled for late 2023. Further information, detailing timing and traffic changes, will be provided at a later date
- Other Metro Tunnel works are occurring in the Parkville Station precinct. These works may result in additional changes to how pedestrians, cyclists and vehicles use the area.
