

Clayton works update

October – November 2025

Works are underway in Clayton to deliver Suburban Rail Loop (SRL) East for Melbourne and Victoria.

What we are doing

 **Day works** 7am – 6pm Monday to Friday and 7am – 1pm Saturday

 **Extended works** 6pm – 10pm Monday to Saturday

Where	When	What we are doing	What to expect
SRL worksite, Clayton Road, Clayton	  Ongoing	— Preparing to excavate the station site	<ul style="list-style-type: none"> — Extended working hours until 10pm — Increased truck and heavy vehicle movements — Moderate levels of noise, light, dust and vibration — Intermittent overnight deliveries
Clayton Road, Clayton	 Ongoing	— Preparing to excavate the station site	— Lane closures between Colonel Street and Haughton Road
Carinish Road east, Clayton	 Mid-November 2025	— Site investigations	<ul style="list-style-type: none"> — Eastbound lane closure and parking closures for up to one week between Clayton Road and Mary Street — Detours in place
Madeleine Road and Carinish Road, Clayton	 Ongoing until late-October 2025	— Site establishment	— Intermittent lane and footpath closures

Impacts

As with all major infrastructure projects, surrounding communities may experience some impacts during construction. The Project supports businesses and residents to continue to live, work, study and shop in their community.

Clayton shopping precinct remains open and accessible throughout these works.

Please contact us on **1800 105 105** to discuss support available if you are impacted by our works.

How we will manage our works

- Maintaining access for emergency vehicles and buses at all times
- Maintaining access to homes and businesses
- Safely removing hazardous materials in accordance with regulations
- Transporting materials from site in covered trucks to minimise dust
- Using water and dust suppressants
- Installing road safety and detour signage
- Pedestrian and cyclist detours in place.

How are we preparing to excavate the station site?

We are building concrete walls which are called 'diaphragm walls'. These concrete walls are built deep into the ground to form a reinforced structure for the underground station.

These are built by excavating deep into the ground, installing steel cages and pouring concrete to create a solid underground wall.
