

## Works Notification

### Substation works

#### St Albans Road, St Albans

11 January to mid 2022

As part of the Sunbury Line Upgrade, we are delivering power upgrades that will enable bigger, more modern trains to run on the Sunbury Line. We wish to advise of ongoing and upcoming works to build a new electrical substation on St Albans Road, St Albans.

#### What we are doing

##### Excavation and conduit installation works

11 January to late February 2022

- Using excavators and boring machines to dig underground. These works will take place from within the construction site along St Albans Road
- Installing new underground conduits which will be used to pull electrical cables through.

##### Substation building works

11 January to mid 2022

- Installing building amenities, cables and electrical equipment inside the substation building
- Using a small crane to lift electrical equipment into the substation building.

##### Landscaping and reinstatement works

Early February to mid 2022

- Footpaths and vegetation will be reinstated around the new substation building
- Installing fencing, gates and a new driveway along St Albans Road
- Installing a decorative screen to the exterior of the substation building.

#### When

- 7am to 6pm, Monday to Friday
- 7am to 5pm, Saturdays and Sundays.

#### What to be aware of

- These works are expected to generate medium to high levels of noise, dust and vibration
- Some substation works will be undertaken out of hours on Saturdays and Sundays. Construction activities that generate lower levels of noise will be undertaken during this time
- Ground conditions in the local area contain basalt rock which, if encountered, will need to be broken to facilitate these works. A water cart will be used to minimise the impact of dust in the area
- There will be an increase in construction vehicles accessing St Albans Road. Traffic controllers will be present at times to assist with vehicle, pedestrian and cyclist movements around the area and the speed limit lowered to 40km per hour
- Native plants and grasses will be planted between the substation building and St Albans Road. All plants and grasses have been chosen to reflect the natural environment in the area
- Concrete mixers will be on site at times to allow concrete pouring for the new footpath and gutter
- The shared user path on the western side of St Albans Road remains closed. This section of path will be reopened in 2022 after substation works are completed.
