# Out of hours track works

Between **9pm, Saturday 21 January and 5am, Sunday 22 January 2023**, we will be conducting minor track works to prepare for future track construction at the South Kensington Metro Tunnel entrance. Construction activities include the relocation of rail, removal of concrete barriers and ballast cleaning.

Works will involve the use of rail excavators, trucks, rollers and other construction machinery. Activities will take place while trains are not running during the night. Construction activities are anticipated to take just two hours.

There will be additional traffic through the area as construction machinery access the rail corridor via Childers Street.

Traffic management will be in place to assist with construction vehicle access, as well as local traffic, pedestrian and cyclist movements around the site.

Works are expected to generate medium levels of noise and vibration, with intermittent periods of high-level noise.

Generator-powered lighting towers are required while we complete night works. Where possible, lights will be positioned to face away from residential properties.

## When:

Between 9pm, Saturday 21 January and 5am, Sunday 22 January 2023

## Where:

Childers Street, Kensington
