

# Works notice

## Scaffold installation

Nicholas Building, southern wall

**Friday 10 November to Sunday 12 November**

As part of Metro Tunnel works, the project team will soon commence the remediation of the Nicholas Building's southern wall, which faces onto the Flinders Quarter site. To prepare for these remediation works, a worker access scaffold needs to be installed below window level of the Nicholas Building.

### What we are doing

- Installing a worker access scaffold halfway up the southern side of the Nicholas Building
- Further details of the remediation works will be provided in future updates.

### What to be aware of

- These works will require drilling into the Nicholas Building to affix the scaffold to the building
- Drilling activities will generate some periods of high-level noise and vibration
- Works will be continuous from 6pm Friday 10 to 6pm Sunday 12 November, however noisier activities will be carried out during the day where possible.
- The worker access scaffold will extend halfway up the Nicholas Building and will not reach the height of any windows.

### When

- 6pm Friday 10 November to 6pm Sunday 12 November.

We appreciate your patience while we undertake these works.
