

SUNBURY ROAD UPGRADE

JANUARY 2022

Project overview

We're upgrading Sunbury Road to improve local connections and keep you moving safely

By upgrading Sunbury Road between Powlett Street and Bulla-Diggers Rest Road, we'll improve local connections and journey reliability for more than 25,000 drivers who rely on this road every day.

This important upgrade will also accommodate for future residential and commercial growth in the area, boosting capacity for traffic while improving the liveability of the area for drivers, cyclists and pedestrians.

About the project

As part of the upgrade we're:

- adding new lanes between Powlett Street and Bulla-Diggers Rest Road
- introducing traffic lights at Francis Boulevard and Lancefield Road intersections to replace existing roundabouts
- installing traffic lights at the entrance to the Sunbury Eco-Hub
- upgrading the existing bridge and building a new bridge over Jacksons Creek
- building new walking and cycling paths
- installing safety barriers along the road.

EXTRA LANES

We'll add extra lanes to make your journey more reliable and improve traffic flow

NEW BRIDGE OVER JACKSON'S CREEK

We're duplicating the creek crossing to provide extra capacity for road users

BETTER CONNECTIVITY

We're improving access to the Sunbury Town Centre, and building new paths for pedestrians and cyclists

SAFER JOURNEYS

We're installing safety barriers to improve safety

What you can expect during construction

We'll engage with the local community to understand how residents and businesses rely on Sunbury Road to enable us to plan our activities and minimise the impact of our work.

As we progress this project, you may need to temporarily alter your route or allow for a slightly longer journey time. We will put in place detours, signage, reduced speeds, and traffic controllers to ensure the safety of everyone using, and working on, the road.

We'll provide advanced notice of short-term impacts or temporary changes to your journey through regular emails, text messages, hand-delivered project updates, electronic message boards and social media. You can also contact us 24-hours a day, seven days a week by calling 1800 105 105.

We'll work mostly during the day between Monday and Saturday and may need to work some nights to minimise impacts to road users.

Coordinating infrastructure projects in Sunbury

We're working closely with a number of other Big Build projects being delivered in Sunbury including the Sunbury Line Upgrade and the Gap Road Level Crossing Removal. We'll maintain a coordinated approach with these projects to minimise disruptions wherever possible.

Environment and heritage management

We're committed to minimising impacts on the local environment and heritage, while we build safer and more accessible roads for everyone.

We'll obtain permits and approvals for any environmental and heritage considerations related to the project. We'll also work with the Wurundjeri Woi Wurrung People and other community groups in the area to make sure we protect any key heritage sites, and significant flora and fauna.

Leaving a legacy

An important part of our project delivery includes implementing legacy initiatives across Victoria. We see the time we spend in communities across the state as an opportunity to leave a long-lasting contribution extending beyond vital road infrastructure improvements. We'll work directly with the local community in Sunbury to strengthen the connection between people and place, and support local development and growth.

Project timeline

Mid-late 2021

- Design and utility investigations
- Early works (southern end)

Early 2022

- Underground service relocation and design begins

Mid 2022

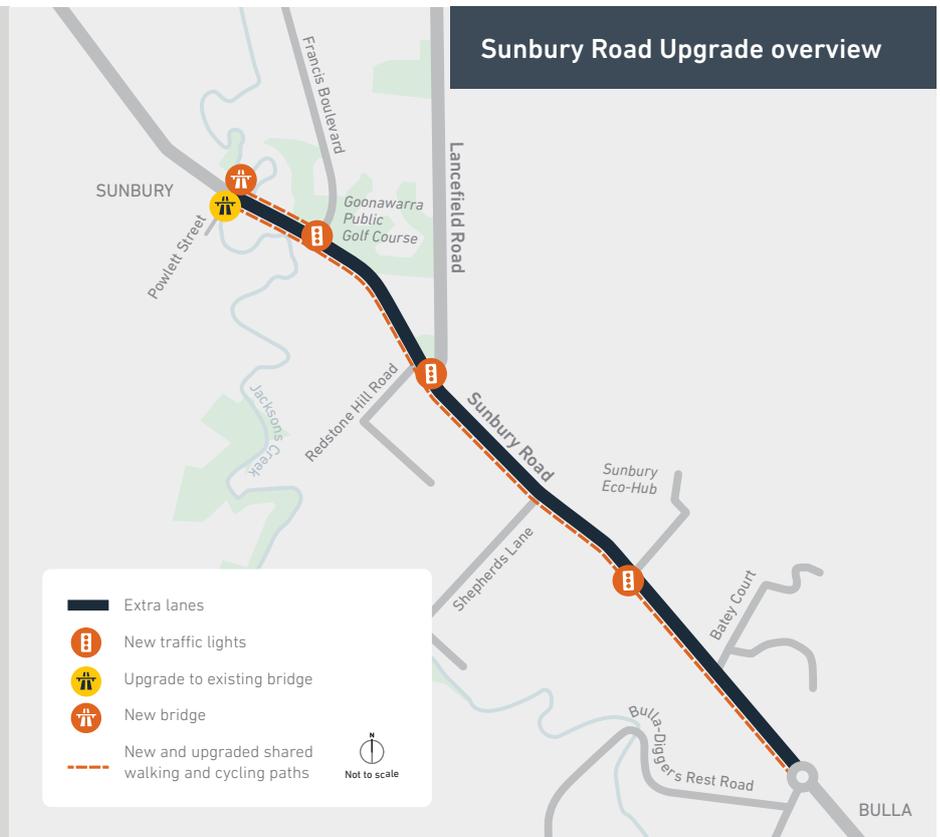

- Major construction begins

2025

- Project complete
