

Artefact Record Sheet

This Artefact Record Sheet is based on those used by real archaeologists. It will help you to work as a team, record your finds and work out what the site might have been!

Record each item as you discover it, and then at the end you can put all your findings in the artefact summary box.

At the end of your dig, talk as a team about the different things you found (and how many you found). Can guess what sort of place your site might have been?
