

Upcoming works on Springvale Road citybound entry ramp

March 2026

We're upgrading the Eastern Freeway with new express lanes, new Eastern Busway, smart technology and a connection to North East Link – slashing travel times and improving travel in Melbourne's east.

What we're doing

In late March and April, we'll build a temporary construction access into the work site at Junction Road Reserve and widen the existing Springvale Road citybound entry ramp onto the Eastern Freeway.

To safely build the access and widen the ramp, we'll work around the clock from:

- **9pm Friday 27 March to 5am Monday 30 March 2026**
- **10pm Wednesday 8 April to 11.59pm Friday 24 April 2026**
- **9pm Friday 1 May to 5am Monday 4 May 2026**

Building direct access to our work site and compound at Junction Road Reserve will help limit the number of construction vehicles using local roads.

Works include:

- installing and adjusting temporary traffic barriers
- noise wall removal
- removal of existing kerb and asphalt
- earthworks and pavement construction
- relocation of existing drainage
- building a temporary construction access into the work site at Junction Road Reserve
- installing asphalt along the widened freeway entry ramp

Where and when

 **24-hour and night works**

Junction Road Reserve, Springvale Road, Nunawading

We'll work during the day and night within Junction Road Reserve and on the Springvale Road citybound entry ramp.

What to expect

- moderate to high levels of noise, dust and vibration during works
- large numbers of construction vehicles, heavy machinery, equipment and workers in the area
- use of directional lighting when working at night
- closure of Springvale Road citybound entry ramp with detours in place.

Managing impacts

We carefully manage our works in line with the project's strict environmental performance requirements including:

- scheduling noisier works during the day
- Installing temporary fencing to mitigate against noise impacts
- monitoring noise and vibration levels with real time monitoring
- minimising light spill with targeted lighting
- preventing dust and water runoff with environmental barriers.
