

Works notice

Marshall Station and surrounds South Geelong to Waurin Ponds Duplication

October 2024

Major construction on the South Geelong to Waurin Ponds Duplication is complete. The project has removed two dangerous and congested level crossings and delivered two upgraded stations for passengers on Victoria's busiest regional rail line.

Major construction is complete on the project, with minor works to continue over coming months. During the winter construction blitz, we removed two level crossings at Fyans Street and Surf Coast Highway, duplicated more than 8 kilometres of track and delivered two upgraded stations, to Marshall and South Geelong.

What we are doing

We are completing works on the upgrades at Marshall Station and the surrounding area.

Works will take place between 7am and 6pm Monday to Friday, with 24-hour works taking place from Saturday 5 October to Sunday 6 October. If further 24-hour works are required, impacted residents will be notified in advance.

Works will include:

- finishing works in the forecourt area including fencing
- completion and commissioning of the lifts
- landscaping, including hydroseeding and tree planting at the station and along Station Road
- ongoing construction of the walking and cycling path, including installation of street lighting
- footpath and car park works at the Drews Road entrance
- pavement and civil works at the bus loop intersection with Marshalltown Road.

What to be aware of

Coaches will replace trains between Geelong and Warrnambool from Saturday 5 to Sunday 6 October. Significant delays are expected.

Check before you travel at bigbuild.vic.gov.au.

There will be regular vehicle movements and workers continuing work in the Marshall Station area.

Localised traffic management will be in place for community and worker safety.

We thank the Geelong community for your patience while we complete the remainder of the works.

Upgrading the Geelong Line

The Victorian and Australian governments are investing more than a billion dollars in projects to deliver better stations and enable more frequent services for communities between South Geelong and Waurin Ponds.

Major construction on the South Geelong to Waurin Ponds Duplication is complete. The project has upgraded South Geelong and Marshall stations and removed the dangerous and congested level crossings at Fyans Street and Surf Coast Highway.

The project is being delivered on behalf of the Victorian and Australian governments as part of the Regional Rail Revival program.

The new Marshall Station building

How we're minimising impacts

Dust

We use a range of measures to minimise dust from construction activities, including the use of water carts to wet down work areas and suppress dust.

Noise and vibration

We regularly monitor noise and vibration levels to make sure they are within the Environment Protection Authority guidelines and aim to limit out-of-hours works where possible.

Lighting

Where possible, portable light towers will be positioned away from residential properties with measures in place to prevent light spill into homes and private areas.
