MAJOR ROAD PROJECTS VICTORIA

MICKLEHAM ROAD UPGRADE – STAGE 1

JUNE 2022

Improving connectivity in Melbourne's North

We're undertaking important planning and development work for the upgrade of Mickleham Road between Somerton Road and Dellamore Boulevard in Greenvale.

This planning and development work includes environmental and site investigations, planning and social studies.

These investigations are an important step in the planning process for all major road projects and will give us a complete picture of the area to help inform the development of a design.

It will also allow us to understand the environmental and social impacts and confirm the scope and cost.

The upgrade will reduce congestion and improve safety and travel time reliability along Mickleham Road.

What we're proposing

Stage 1 of the Mickleham Road Upgrade will involve:

- building extra lanes in each direction on Mickleham Road between Somerton Road and Dellamore Boulevard
- adding new traffic lights at Aitken College
- replacing the roundabout at Somerton Road and Mickleham Road with a new traffic light intersection
- upgrading the Hillview Road and Dellamore Boulevard intersections
- building new sections of walking and cycling path to improve connectivity along Mickleham Road.

How you'll benefit

The upgrade will:

- provide more reliable journeys for over 25,000 motorists each day
- improve travel times and reduce congestion during peak hours
- improve safety and traffic flow on Mickleham Road
- make it easier and safer to walk and cycle in the area.

Less congestion

We'll build extra lanes and upgrade intersections to improve traffic flow.

Safer journeys

New traffic signals and other safety features will lower the risk and severity of crashes.

Improved connectivity

New and improved walking and cycling paths will create better connections to local schools, shops, community hubs and public transport.

Timing

Further information on timing for construction of the upgrade will be provided as planning progresses.
