

PROJECT OVERVIEW

CAMERONS LANE INTERCHANGE

MARCH 2026

Planning is progressing for the Camerons Lane Interchange at the Hume Freeway.

Overview

To improve freeway access, cater for the growing population and unlock and support future urban development, the project will:

- build a new interchange at Camerons Lane and the Hume Freeway
- close the existing freeway ramps at Lithgow Street
- upgrade and realign the Hume Freeway in Beveridge to cater for the new interchange
- add walking and cycling paths
- upgrade Spring Street between Minton and Lithgow streets
- install traffic lights at the intersections of:
 - Camerons Lane/Patterson Road, and
 - Minton Street/Spring Street

The Commonwealth Government has committed \$900 million to complete the Camerons Lane Interchange.

Status

A business case for the Camerons Lane Interchange has been completed, which examined the interchange in detail. It recommended a design and identified the best delivery approach.

We've been progressing planning and have completed detailed on-site environmental investigations to further understand flora and fauna which might be impacted.

We have also been undertaking cultural heritage assessments and are currently preparing a Cultural Heritage Management Plan to ensure that any identified heritage values are appropriately protected and managed throughout the project.

Next steps

Planning work for the interchange is continuing as the project moves into the pre-construction stage.

Key activities include:

- on-site investigations including identifying underground utilities, and testing ground conditions
- refining the project design and construction approach
- obtaining planning approvals

Construction timelines will be confirmed once our planning has progressed further.

Project timeline

- 
2024 to mid 2025
 Planning, site investigations and consultation to inform the development of the business case
- 
Mid 2025
 Pre-construction commencement
- 
Late 2025
 Camerons Lane Interchange business case completed
- 
March to April 2026
 Community consultation
- 
Early 2027
 Appoint construction partner

Benefits

- 
 Reduce congestion and improve travel times
- 
 Improve access to and across the freeway
- 
 Improve connections to community facilities, employment, healthcare and schools that are split across the freeway
- 
 Cater for rapid population growth and increased vehicle movements
- 
 Unlock and support future urban development in the high growth area
- 
 Improve road safety
- 
 Support the Beveridge Intermodal Freight Terminal, ensuring there is a direct and efficient connection to the Hume Freeway
- 
 Improve freight productivity

Minton Street Planning Study

A study has been completed, to determine what upgrades are needed to support the growth of the area and cater to future land use.
