STATE LIBRARY PROGRESS VIDEO

STATE LIBRARY

The first major concrete pour occurred at the La Trobe Street site earlier this month.

Almost 700 cubic metres of concrete has now been poured, forming sections of the permanent base floor slab.

ARDEN

At Arden Station, the first concrete pour of the suspended roof slab is now complete, an exciting milestone marking the start of construction of the station roof.

The 600 cubic metre pour was the first of 11 roof slab pours that will be completed between now and April next year.

PARKVILLE

The next phase of construction at Parkville has begun with the commencement of piling works at Grattan Street west for the station entrance adjacent to the Peter MacCallum Cancer Centre.

At the Grattan Street east site, the station base slab is now complete. This pour required over 8,000 cubic metres of concrete and 2500 tonnes of steel reinforcement.

Grattan Street West

ANZAC

The two TBMs working in the East, Alice and Millie, are making significant progress on their way to the Eastern Portal in South Yarra.

Both TBMs are now installing permanent segments.
