RAIL LOOP**

SRL East travel time estimates

Connecting suburbs, slashing travel times, easier journeys

JUNE 2025

Acknowledgement of Country

Suburban Rail Loop Authority acknowledges the Traditional Owners of the land, sky and waters across Victoria and pays respect to their Elders past and present. We proudly recognise the strength and enduring connection to Country as the world's longest living culture and the profound wisdom, resilience, and contributions of First Peoples and their communities. We are committed to the ongoing journey of reconciliation by embedding self-determined Aboriginal ways of knowing and doing across the lifespan of the SRL project.

More transport, more homes

Suburban Rail Loop (SRL) will deliver multi-generational benefits for all Victorians, opening up faster and easier access to jobs, education, health services and affordable homes across Melbourne's middle suburbs.

This report on travel time estimates and enhanced connectivity provides up-to-date estimates for public transport journeys using SRL East and has been developed by transport planners at Suburban Rail Loop Authority.

The travel estimates are practical examples of how SRL will integrate with the existing transport network and provide quick, convenient and reliable connections for people to travel across Melbourne's suburbs.

All current journey times have been calculated using the Public Transport Victoria (PTV) app, at 8am, or with services as close to this time as possible, to reflect common peak hour journeys to key destinations across Greater Melbourne. Walking times have been calculated using the PTV default setting for walking speed.

All travel times for both current journeys and future SRL journeys include the time spent on the train, tram and/or bus – station to station, stop to stop – plus simple interchange time, excluding wait times.

The future journeys take into account the opening of Metro Tunnel in 2025 and other timetable changes since the publication of the SRL Business and Investment Case in August 2021, and reflect more specific journey location start and end points than the data modelled in the Business and Investment Case. They will be updated ahead of the opening of SRL East in 2035 to reflect further refinements in bus, train and tram timetables.

Car journeys provide a 'like-for-like' comparison, calculated using Google Maps for the same origin, destination and weekday start times as the public transport journeys, using the fastest time, and toll roads if relevant.

Car journeys can be highly variable due to congestion, weather conditions, road works, accidents and other disruptions. As such the data has been cross-checked across multiple days and sources to ensure it is representative of a typical trip. All journeys include the time spent in the car, excluding time for parking or walking to final destination.

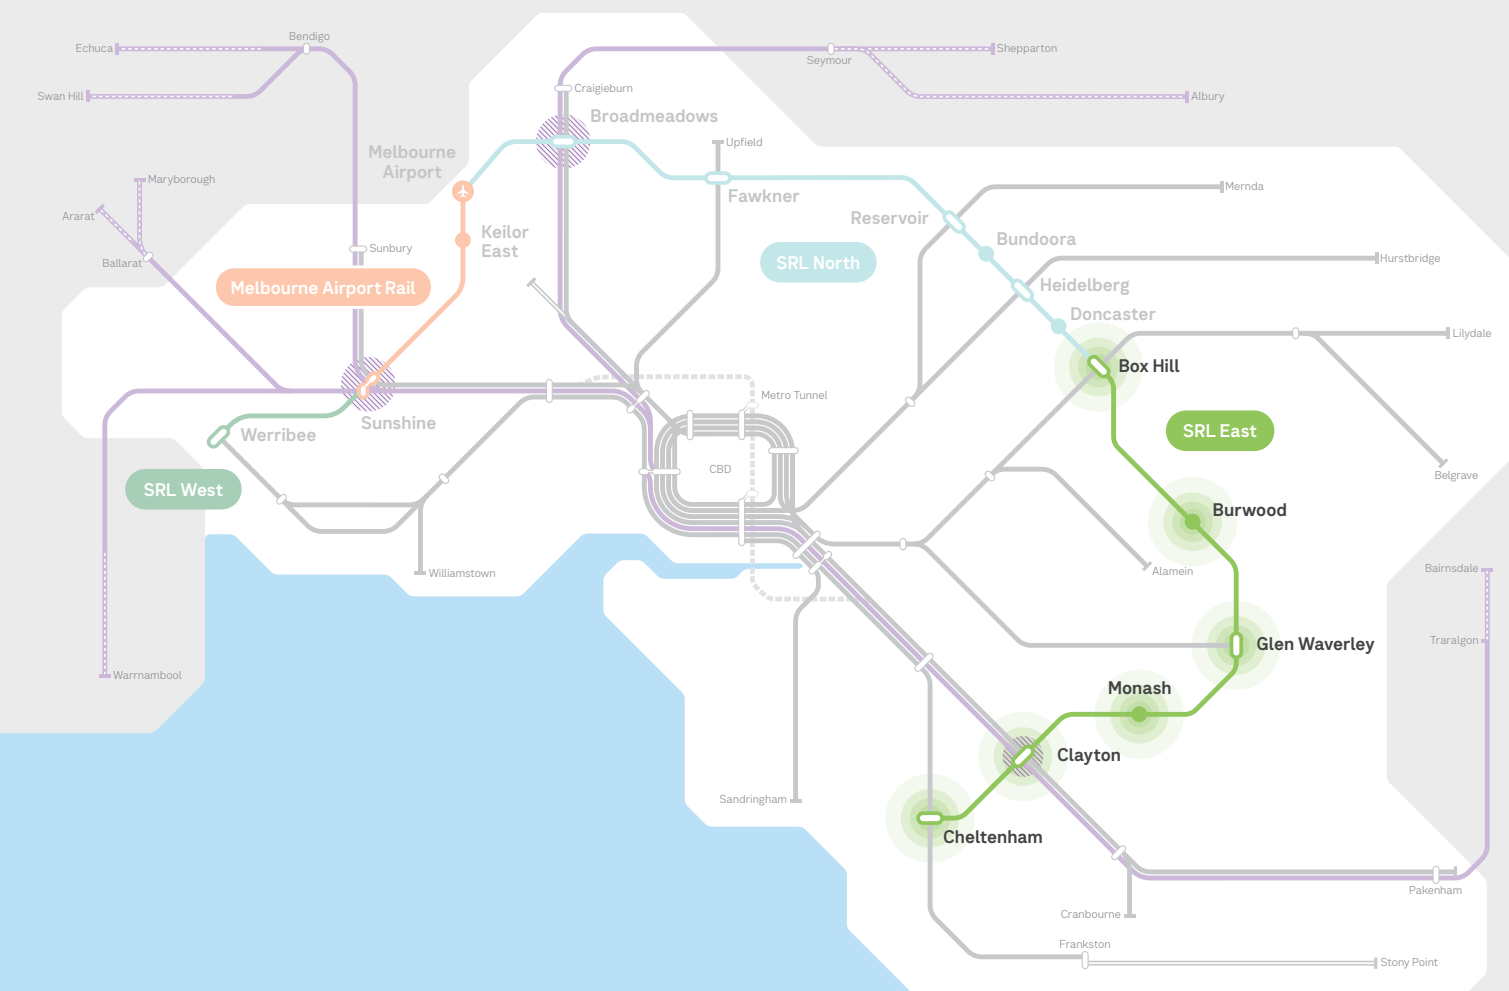

Car journeys are based on 2025 travel times and do not take into account the road network and congestion levels in 2035 when SRL will open. Car journey times are likely to be longer in 2035 due to population growth and congestion, and travel time savings gained by using SRL instead of driving are therefore likely to be greater in 2035.

SRL East from Cheltenham to Box Hill is under construction, with six new underground stations to be connected by 26 kilometres of twin tunnels.

As Australia's largest housing project, SRL will deliver thousands more homes where people want to live – close to jobs, services and world-class public transport.

In addition to delivering new transport connectivity and slashing travel times, SRL East will support the delivery of 70,000 additional homes in the neighbourhoods around the new stations.

Tunnelling on SRL East will start in 2026 and trains will be taking passengers in 2035.

- | | |
|-----------------------------|---|
| SRL East | Regional lines |
| SRL North | Transport super hub |
| Melbourne Airport Rail | More homes |
| SRL West | Existing interchange station and customer service hub |
| New interchange stations | Metropolitan area |
| New stations | Regional area |
| Metro Tunnel (opening 2025) | |
